

Unemployment Leaving Millions of Americans without Health Coverage

A survey of 13,000 adults, conducted in February, June and September:

FEB

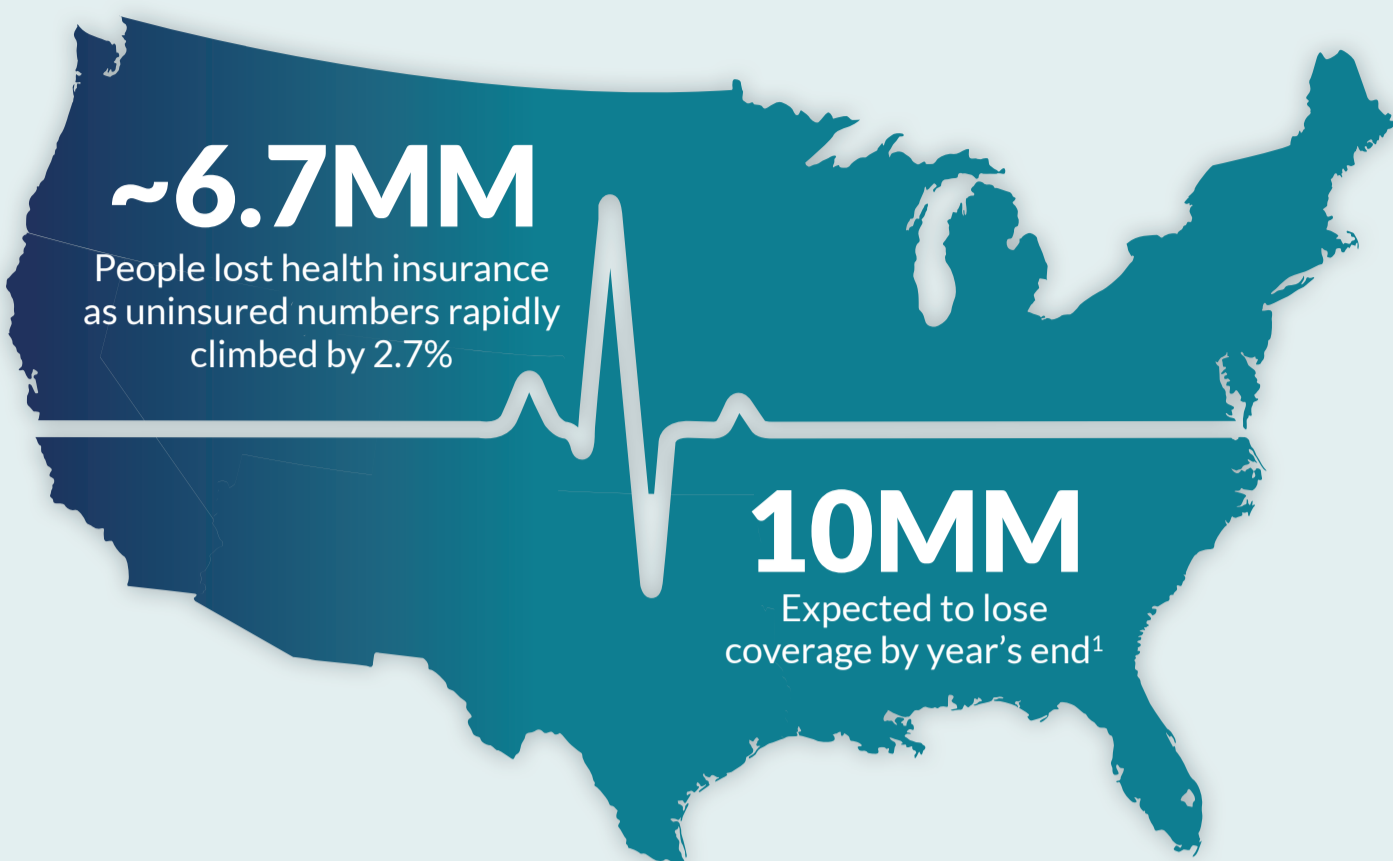

6,402 Surveyed

JUNE

3,680 Surveyed

SEPT

3,002 Surveyed

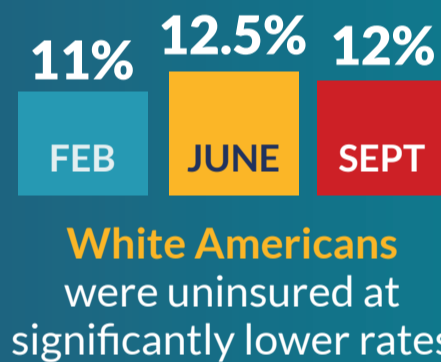

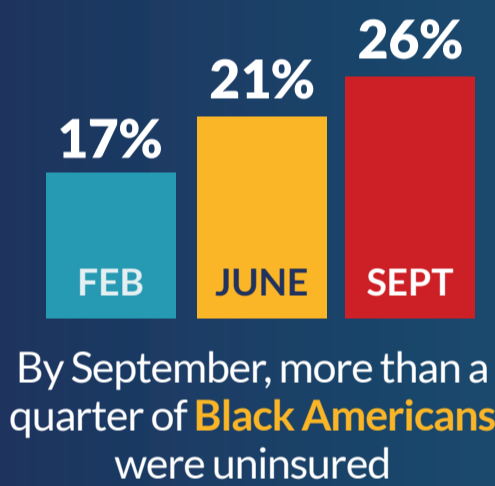

36 Million
Americans are now uninsured

Disparities in "Insurance Deprivation"

While 8% of Americans overall lost their health insurance coverage due to COVID-19, these numbers were significantly higher for Black Americans.

The uninsured levels of all other racial groups either bounced back to pre-pandemic levels or remained within 2% of their pre-pandemic levels.
